

EXCHANGE PROGRAMME

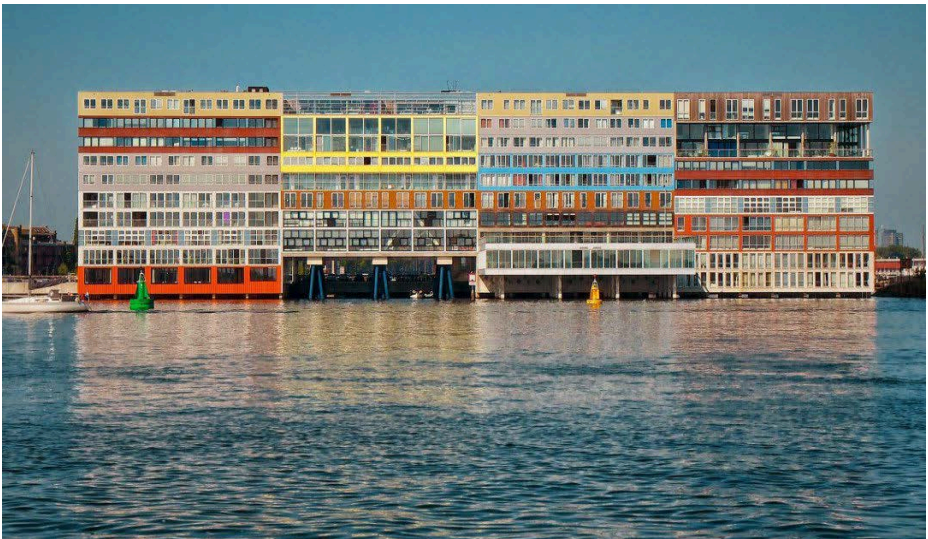

DEPARTMENT OF BUILT ENVIRONMENT

CREATING TOMORROW

Programme Architecture

Students have to apply for the complete 34 ects programme.
This programme is open to students in the field of architecture.

3rd quarter	grade	code	form
Lectures sustainability 1	3 ECTS	LE1	lecture
Design project A1	5 ECTS	DA1	project
Theoretic methodology 1	3 ECTS	TM1	workshop
Study of Form	3 ECTS	SF	workshop
Capita Selecta lectures 1	1 ECTS	CS1	lecture
Excursion Dutch architecture	1 ECTS	EX1	excursion
4th quarter	grade	code	form
Lectures sustainability 2	3 ECTS	LE2	lecture
Design project A2	5 ECTS	DA2	project
Theoretic methodology 2	3 ECTS	TM2	workshop
Research public space	3 ECTS	PS	workshop
International workshop	2 ECTS	WS	workshop
Capita Selecta lectures	1 ECTS	CS2	lecture
Excursion Dutch architecture 2	1 ECTS	EX2	excursio

Programme description exchange programme Architecture

Lectures Sustainability

A range of lectures on the theme sustainability as input for the design project.

Design project in architecture

Architecture design project: a mixed function complex of housing and school with their additional functions in a challenging urban area. Working on research and (urban) analyses, concept, architectural design, structural design and architectural details.

Study of form

Autonomous and essential studies of form supporting design processes. Working on the fundamental principles of form and space.

Theory and Methodology

Studying on essential subjects and theories in architecture, urban design, ethics, etc. The meaning of architecture in its social context. Basic knowledge about design methods.

Research public space

By studying cases studies of public space design, the student gain knowledge on the subject in order to make a design.

Excursion Dutch Architecture

Organizing, attending and evaluating an architectural trip in the Netherlands with fellow students.

International Workshop programme

International workshop programme. Participation of partner universities or/and the professional field in architecture.

Capita Selecta

Contemporary architecture, urban design, landscape architecture (depending on the theme)
Organized by the Academy of Architecture Amsterdam Master course Architecture.

Programme Architectural Technology

Students have to apply for the complete 34 ECTS programme.

This programme is open to students in the field of architectural technology.

3rd quarter	grade	code	form
Lectures sustainability 1	3 ECTS	LE1	lecture
Design project AT1	5 ECTS	DAT1	project
Hyper Earth ships	3 ECTS	HE	training
Façade Design	3 ECTS	FD	worksho
Capita Selecta lectures 1	1 ECTS	CS1	lecture
Excursion Dutch architecture 1	1 ECTS	EX1	excursion
4th quarter	grade	code	form
Lectures sustainability 2	3 ECTS	LE2	lecture
Design project AT2	5 ECTS	DAT2	project
Complex details	3 ECTS	CD	workshop
Smart Buildings	3 ECTS	SM	workshop
International workshop	2 ECTS	WS	workshop
Capita Selecta lectures 2	1 ECTS	CS2	lecture
Excursion Dutch architecture 2	1 ECTS	EX2	excursion

Programme description exchange programme Architectural Technology

Lectures Sustainability

A range of lectures on the theme sustainability gives input for the design project.

Design project in architectural technology

Architectural technology project: a transformation of structure of a public building with the aim of more flexibility. Working on research and analyses, concept, design and architectural details.

Zero on the meter dwellings

In the near future burning fossil fuels to warm your house will be no option anymore. It is therefore important to be able to design your house without external connection on gas.

Complex details

In contemporary modern architecture; concept, design, expression, materials and details are strongly related to one another. They all deliver a contribution to the architectural concept. In this workshop students work on analyses of complex modern architecture and there complex details.

Hyper earth ships

By using only waste materials (but not building waste) and materials that can be found in the immediate environment of the location and by the use of hand tools only, the students design their own garden house.

Façade design

The assignment is to design a glass curtain facade for the 'Meelfabriek' in Leiden. The students start with analysing glass curtain walls, historical as well as modern. Then they analyse different materials with which the glass curtain facade will be designed.

Excursion Dutch Architecture

Organizing, attending and evaluating an architectural trip in the Netherlands with fellow students.

International Workshop programme

International workshop programme. Participation of partner universities or/and the professional field in architecture.

Capita Selecta

Contemporary architecture, urban design, landscape architecture (depending on the theme) Organized by the Academy of Architecture Amsterdam Master course Architecture.
