INAUGURAL LECTURE

Civic Interaction Design

Shaping Public Life in a Network Society

Martijn de Waal | Professor Civic Interaction Design

The digital transition has yielded new types of public spaces and new ways in which citizens and governments relate to each other. The research group Civic Interaction Design explores the role of interactive media and digital technologies in these developments. Together with businesses, governments, designers, cultural institutions and students, the research group investigates how the design of interactive experiences, digital platforms, and online services can contribute to public life. How can public values regarding democracy, diversity, and sustainability be embedded in an emerging network or platform society?

Martijn de Waal, Professor in Civic Interaction Design, will present his inaugural lecture on Tuesday, March 23, 2021 at 4 p.m. (CET). In this lecture he will explain how his research group contributes to research, education, and practice.

You are cordially invited by the Board of Trustees to attend this lecture digitally. Because of the measures taken to prevent the spread of the coronavirus, this lecture will be closed to the public and be presented as a livecast.

Dr. G.R. (Geleyn) Meijer
Vice-Chancellor, Amsterdam
