

## Using Proctorio

# What data are processed?

### Name

First name, initials and last name

On-screen activities while making the exam

Email address

Keystrokes and mouse clicks while making the exam

Image of the HvA student card

The IP address of the computer network to which the device is connected

A picture, taken through the webcam of the students' device

The web pages the student visits during the exam

Video and audio recordings of the student and the students' surroundings during the exam

These are recorded via the webcam of the students' device

The students' answers to the exam questions

### For the purposes of:

- Authentication
- Fraud control
- Time frame control

### Where?

The personal data collected is stored on the service providers' (Proctorio) Microsoft Azure-servers in Amsterdam and München.

### How?

Proctorio uses zero-knowledge encryption. This means that your personal data cannot be identified by Proctorio.
