

## Starting Software Programs via apps.hva.nl

A number of software programs, such as Autocad, Inventor, Revit, Kofax, Basware and Payview are not available to employees via the Virtual Desktop (HvA Concern Desktop), for example due to storage restrictions or extra security requirements. These programs can be found separately on apps.hva.nl on the tab *Apps* (see the following screenshot).

If no programs are displayed on this page, you will first need to add them as a favourite. You can do so by clicking on the + (on the left side of the screen) and by clicking on *All Apps*.
