Students and organizations team up to work on the Sustainable Development Goals

WHAT IS THE SDG-CHALLENGE?

Want to experience working as a sustainability consultant for leading organisations? Join the SDG-Challenge!

The UAS SDG-Challenge pairs up 10 interdisciplinary UAS teams with 10 organisations in the Netherlands. Each student consultant team consists of a maximum of 15 students and 1 employee with diverse backgrounds. The team will work with a leading organization, such as the KNVB or FairTrade to solve a challenge this organisation faces in regards to the SDGs. Besides teaming up with organisations, students will get the opportunity to think on how to improve the SDGs within education by becoming a part of the UAS SDG Movement. The idea with the most impact wins!

In 2015, the United Nations came up with the 17 global Sustainable Development Goals, to create peace and prosperity for people and the planet. Soapbox created the SDG-Challenge, because they see the potential in students to generate fresh ideas and create change.

WHY PARTICIPATE?

- LinkedIn Certification
- A chance to work on the SDGs and make a real impact on the world.
- Gain valuable work experience working on a real challenge for an organization.
- Build connections with like-minded students and organizations (that could be future employers).

TIME INVESTMENT

The challenge will take about 3 days of your time, spread out over 3 months.

The challenge will consist of a kick-off, sprint day, YES-DG day and the grand finale in which the winner will be announced!

CHALLENGES WE WORKED ON

Challenge:
How can we make bars more sustainable, whilst staying profitable and adding customer value?

Solution:
The Green Star Club - A Heineken sustainability quality mark that offers access to the Green Star Club.

Impact:
Bars share their best practices and incentives to be more sustainable.

Challenge:
How can the Municipality of Den Bosch become a circular economy by 2050?

Solution:
Circular analytics - A real time dashboard of waste data.

Impact:
More targeted and optimised waste management

Are you up for the challenge?
