# Embedding publications from the library collection in your Brightspace course

Books, articles, chapters or databases

AUAS Library Copyright Team

Bibliotheek

Creating Tomorrow
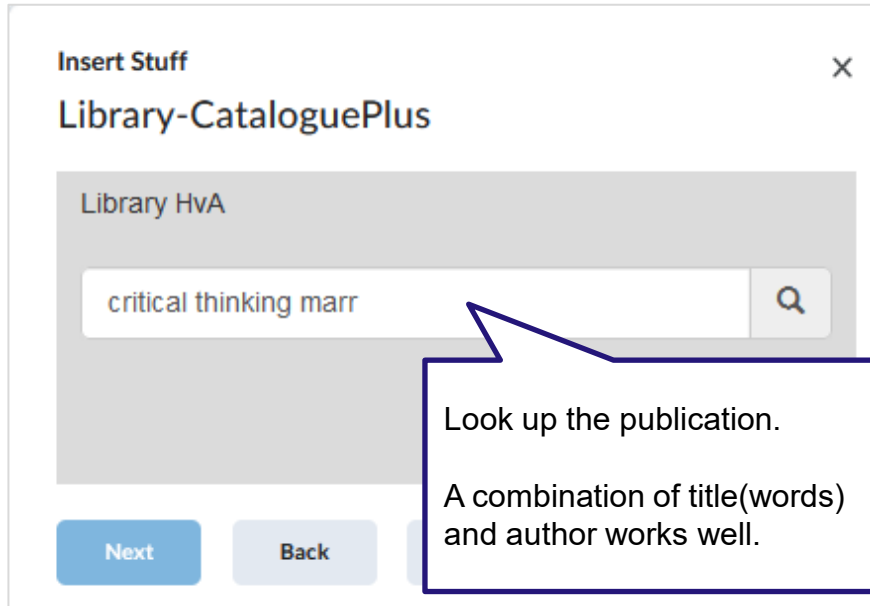

Embedding publication or database in Brightspace in a nutshell

To embed a book, article, chapter or journal scroll down to **Library-CataloguePlus**.

To embed a database scroll to **Library-Database selector.**

Creating Tomorrow

Adding a book, article, chapter or journal

Add books, chapters, articles or journals via **Insert stuff** > **Library-CataloguePlus**.

Look up the publication.

A combination of title(words) and author works well.

You can filter by publication type (book, chapter, article, etc.)

Good to know …

This is what the student will see.

- Digitally available publications can be opened directly from the catalogue,
  for printed publications the exact location is shown.

- Books and journals always display 'Check availability', even if the material is available digitally.

- Articles always show 'Available Online'.

If you embed a publication this way, no further reference to the source is necessary.
